The new Asset Assistant is live and ready for use! The product is called AppTree and is accessible through a tile on the Staff section of the myUNM website.

**NOTE:** The log-in to the app uses "netid@unm.edu" email addresses. Please do not use other email addresses (i.e. salud, health, kunm.org, unfund.org, etc.) when logging in. Your correct preferred email address will be used for notifications once you log in and you can also add additional email addresses.

If you have tried to log in with another email address and received an error message, clear the cache of the browser that was used (Chrome and Firefox are suggested) and use your "@unm.edu" email address.

http://my.unm.edu/home/staff

The Asset Assistant is conversation-based, like a chat, and will walk you through every step. You will start a conversation and be presented with options to choose from. All of the things that you used to do with forms and emails can now be done through the Assistant. This includes transfers, checkouts/check-ins, location updates, condition updates, reprint requests, serial number change requests, disposal requests and surplus requests!

You can also download the mobile app which will allow you to scan barcodes using the camera on your mobile device. Search for “AppTree IO” in the App Store (iOS) or Google Play Store (Android) and then enter “unm” as your team. *All lower case: unm.*
