The UNM Inventory Assistant can be accessed through a tile on the University’s myUNM page. The AppTree-UNM Inventory Assistant tile will be the starting point for the Inventory Assistant.

The Inventory Assistant is used by University departments to conduct the annual physical inventory of computers, drones and capitalized equipment as required by New Mexico State statute and by the Federal Government. The UNM Inventory Assistant can also be used to Transfer an Asset, Dispose of an Asset, Check out an Asset and Find an Asset.

The Inventory Assistant is designed in an app format and uses conversations to create transactions that are routed through workflows for approvals.

Department Inventory Contacts (IC) will start a conversation. Upon completion by the Inventory Contact the transaction will route to the Department Dean, Director or Chair (DDC) for approval. The transaction will then route to additional offices including Inventory Control for review.

The three dots in the lower right corner are used for selecting the Inventory Assistant for production.

The question mark is used to access the Help Assistant to setup a mobile device such as a smart phone or tablet.

The plus sign is used to start a new conversation.

This blue icon is used to submit information that has been entered.
Note that multiple assets can be added to the request for deletion of an asset transaction.

**Note:** An Explanation memo is required for each disposal category. A copy of a Police report is required for Theft.

Select Explain why your department will not use this asset anymore. Provide a business purpose for the asset disposal. Press enter or select the blue icon.

Select Submit this delete request or Add another asset.
Routing for the deletion request will vary based on asset related criteria: equipment was purchased on a grant, the adjusted cost and net book value of the equipment.

Note the routing to the left is typical for tagged computers that are not capitalized (adjusted cost is less than $5000)

The DDC can approve the transaction, return the transaction for additional information or reject the transaction.

An email notification will be sent from the Inventory Assistant notifying the Inventory Contact, the DDC and the core offices that a transaction requires their review.
